MERIT BADGE SERIES

ELECTRONICS

BOY SCOUTS OF AMERICA®
ELECTRONICS

“Enhancing our youths’ competitive edge through merit badges”
Requirements

1. Describe the safety precautions you must exercise when using, building, altering, or repairing electronic devices.

2. Do the following:
   a. Draw a simple schematic diagram. It must show resistors, capacitors, and transistors or integrated circuits. Use the correct symbols. Label all parts.
   b. Tell the purpose of each part.

3. Do the following:
   a. Show the right way to solder and desolder.
   b. Show how to avoid heat damage to electronic components.
   c. Tell about the function of a printed circuit board. Tell what precautions should be observed when soldering printed circuit boards.

4. Discuss each of the following with your merit badge counselor, and then choose ONE of the following and build a circuit to show the techniques used:
   a. Tell how you can use electronics for a control purpose, and then build a control device circuit.
   b. Tell about the basic principles of digital techniques, and then build a digital circuit. Show how to change three decimal numbers into binary numbers and three binary numbers into decimal numbers.
c. Tell about three audio applications of electronics, and then build an audio circuit.

Show how to read the schematic diagram of the project you chose and, to the best of your ability, explain to your counselor how the circuit you built operates.

5. Do the following:
   a. Show how to solve a simple problem involving current, voltage, and resistance using Ohm’s law.
   b. Tell about the need for and the use of test equipment in electronics. Name three types of test equipment. Tell how they operate.

6. Find out about three career opportunities in electronics that interest you. Discuss with and explain to your counselor what training and education are needed for each position.
Electronics Resources

Scouting Literature

*Computers, Electricity, Inventing, Radio,* and *Robotics* merit badge pamphlets

Visit the Boy Scouts of America’s official retail website at http://www.scoutstuff.org for a complete listing of all merit badge pamphlets and other helpful Scouting materials and supplies.

Books

Leon, George deLucenay. *Electronics Projects for Young Scientists.* Franklin Watts, 1991. Introduces the basic principles of electronics and includes project ideas such as a crystal radio, an intercom, and a pair of electronic dice.

### Magazines

**Nuts & Volts**
430 Princeland Court
Corona, CA 92879

Website: [http://www.101science.com/Radio.htm](http://www.101science.com/Radio.htm)

### Electronics Parts and Suppliers

In most places, *Radio Shack* stores can be the best source for electronics parts. However, most Radio Shacks have reduced their parts inventories, which means you might have to look elsewhere to find all the parts you need for a project (or check out their website, [http://www.radioshack.com](http://www.radioshack.com)). Electronics parts and kits also can be ordered over the Internet or via mail or toll-free telephone from various suppliers.

Whenever you go online, be sure you have your parent's permission first.

**Allied Electronics**
7151 Jack Newell Blvd. S.
Fort Worth, TX 76118
Toll-free telephone: 866-433-5722

Acknowledgments

The Boy Scouts of America thanks Mary Wiggins, director of educational initiatives for the Electronic Industries Foundation, for her assistance with this new edition of the Electronics merit badge pamphlet. The EIF strives to create new ways to engage young people in the pursuit of science and technology, including electronics.

The Boy Scouts of America is grateful to the men and women serving on the Merit Badge Maintenance Task Force for the improvements made in updating this pamphlet.
