

Updates to Internet Rechartering

The Internet Rechartering application is getting a facelift and a few new functions.

What is staying the same?

- Access codes will still be distributed by councils and will be used by units to log in.

Internet Rechartering

Welcome and thank you for using Internet Rechartering from Boy Scouts of America. Internet Rechartering allows you to renew your unit's charter online and perform the following actions:

- Select members from your existing charter roster.
- Prorate members from another unit.
- Add new members.
- Update member information, and
- Print a summary of costs associated with the new charter.

Before beginning Internet Rechartering, collect all member information, including new member forms with the appropriate signatures. To complete the process, you must be connected to a printer to print the final report for signatures.

If you are a new user, you can consult the [help](#) and the [tutorial](#) for instructions on using Internet Rechartering.

- First Time Users must register to enter the Internet Rechartering system. After initial registration, they will enter the system as a Returning User.
- Stages and steps remain the same with one new feature: electronic authorization and payment inserted before the final step.
- Councils will continue to use reports that show each unit's renewal status.

What features have been added?

- The new look is consistent with *my.Scouting Tools* so that it is easier to read and navigate.
